

*FlashVent™***FLASHCAP® VENT FLASHING**

PVC Low Slope Systems

**OVERVIEW**

FlashCo's FlashCap Plumbing Vent Pipe Flashings are pre-fabricated plumbing vent flashings and counter flashings. This two-part system is a superior termination design compared to the traditional hose clamp and caulking method, both aesthetically and functionally, providing faster install times and an attractive finish to any roof.

FlashCap Plumbing Vent Pipe Flashings are available in four standard sizes to fit the following nominal pipe sizes: 1.5", 2", 3", and 4". The actual inside diameter of each boot is larger than the title indicates, accommodating plumbing pipes with different wall thicknesses. Each FlashCap is molded using 60 mil white TPO, while the accompanying boots can be fabricated from multiple colors of 60 mil reinforced PVC. Contact your FlashCo representative for material availability and lead times.

**INSTALLATION**

FlashCap Plumbing Vent Pipe Flashings shall be installed in accordance with the recommendations and specifications of the roofing material manufacturer.

1. Place flashing over the penetration.
2. Lift flashing flange and heat weld to existing membrane gutter lining, working from center outwards.
3. Apply cut edge sealant (provided by others) around edge of flange.
4. Place FlashCap over plumbing vent and flashing.
5. After the flashing has cooled, probe welds to verify a secure bond.

**FEATURES AND BENEFITS**

- Two-piece design provides superior termination
- Faster installation
- Clean, consistent appearance

**SAVING THE CONTRACTOR TIME**

- *FlashCo's Brand Promise is Speed:* shipping 90% of orders within 3 days.
- 24/7/365 Online Contractor Portal and additional time-saving tools
- Most orders delivered on FlashCo's own delivery trucks
- Get off the roof sooner
